A Social Health Atlas of Australia was produced by the Public Health Information Development Unit, University of Adelaide, South Australia. The project was funded by the Commonwealth Department of Health and Aged Care and supported by the South Australian Department of Human Services.

The majority of data mapped in the atlas, and the maps, was produced by Prometheus Information Pty Ltd, using the HealthWIZ software package. Further details of these and other contributors to the project are noted in the *Acknowledgements*.

Cover design by Julie Johinke using a photograph by Paul Doherty (photograph entitled *Merti Merti Sandhills, Strzelecki Track*).

Printed in Australia by Openbook Publishers.

Introduction

The following tables (**Table A1.1** to **A6.1**) include the data for topics mapped in the second edition of *A Social Health Atlas of Australia*.

The value calculated for each area mapped has been assigned a ranking, based on the percentage value, rate or standardised ratio for the variable. A rank of ‘1’ indicates the area has the highest percentage, rate or standardised ratio (ie. its population has the highest level of disadvantage, the poorest health status or the highest rate of health service utilisation). Separate rankings have been assigned for the areas in the capital cities, other major urban centres and non-metropolitan areas.

Where totals are not equal to the sum of the component figures, the discrepancy exists because the totals either cover areas which were excluded from the analysis (ie. areas with small numbers of cases), or include residents outside of Australia or particular

States; and/or because the component figures have been rounded.

The data can also be accessed electronically from a CD-ROM (for Windows). These data are in spreadsheet files in Microsoft Excel 97 format and include all of the data mapped in the atlas (order from AusInfo, or see details on PHIDU the World Wide Web site: www.publichealth.gov.au) Some data are also available in the HealthWIZ database (see www.prometheus.com.au)

The following tables provide brief notes on the data mapped. More complete details are generally provided in the atlas.

Data details

Details of the demographic and socioeconomic status variables mapped are shown in **Table 1**.

Table 1: Details of demographic and socioeconomic variables

Topic and variable name	Numerator	Denominator
Age distribution		
children aged 0 to 4	All children aged from 0 to 4 years	Total population
people aged 65 and over	All people aged 65 years & over	Total population
Families		
single parent families	Single parent families with dependent children [under 15 yrs]	All families
low income families ¹	Families with income less than \$21,000 p.a. [\$400 per week]	All families with an income
high income families ²	Families with income of \$52,000 or more p.a. [\$1,000 per week]	All families with an income
Labour force		
unskilled and semi-skilled workers	Intermediate production & transport workers; labourers & related workers	Total employed labour force
high status occupations ²	Managers and administrators; & professionals	Total employed labour force
unemployed people	People with labour force status as unemployed	Total labour force
female labour force participation	All females aged 20 to 54 years in the labour force	All females aged 20 to 54 years
Educational participation and achievement		
early school leavers ³	People who left school at age 15 years or less, or did not go to school	Population aged 15 years & over
Aboriginal and Torres Strait Islander	Aboriginal and/or Torres Strait Islander people	Total population
People born in predominantly non-English speaking countries		
resident for five years or more	Number born in predominantly non-English speaking countries and resident for five years or more	Total population
resident for less than five years	Number born in predominantly non-English speaking countries and resident for less than five years	Total population
proficiency in English	People aged five years and over and born in predominantly non-English speaking countries who speak English ‘not well’ or ‘not at all’	Population aged five years and over
Housing		
housing authority rented dwellings	Occupied private dwellings rented from the State/Territory housing authority	All occupied private dwellings
dwellings with no motor vehicle	Occupied private dwellings with no motor vehicle garaged or parked there on Census night	All occupied private dwellings

¹When interpreting the figures for low income families in the text in this chapter, it should be noted that the indicators of low income used in the comparisons (\$12,000 per annum or less in 1986 and less than \$21,000 per annum in 1996) do not equate to equivalent incomes and have thus not been adjusted based on changes to buying power. Rather, they are based on categories of income available from the Census and denote comparability of income in 1986, 1991 and 1996 based on the levels of incomes of recipients of the sole parents’ allowance and unemployment allowances.

²These variables were not mapped but are included in the correlation analyses.

³This variable was adjusted using age-sex standardisation: a description of this process is in the text above.

Source: Compiled from project sources

The pensions and benefits are listed in **Table 2**, which also shows the way in which the DFACS and DVA data were combined for mapping. Percentages were calculated on population figures

representing as near as possible the ages applicable to the particular pensioner and beneficiary groups.

Table 2: Income support payments mapped, 30 June 1996			
Department of Family & Community Services (DFACS)		Department of Veterans' Affairs (DVA)	Denominator
Pensions		Pensions	Age group (years)
Age ¹		Service (age) ²	Males 65 & over Females 60 & over
Disability Support		Service (PI ³)	Males 15–64 Females 15–59
Sole Parent ⁴		.. ⁵	Females 15–54
Unemployment benefits			
Youth Training Allowance & Newstart Allowance ⁶		..	Males 15–64 Females 15–59
Children ⁷		.. ⁸	Population 0–15

¹Excludes wife pension, as recipients are under age-pensionable age. The small number of males under 65 years and females under 60 years of age receiving an Age Pension were also excluded from this analysis

²Includes wife/widow pension, as recipients are mainly of age-pensionable age

³Permanently Incapacitated: data for males aged 65 years and over and females aged 60 years and over were included with Age Pensions

⁴Details for males were excluded from the analysis

⁵DVA War Widows pensioners are excluded as this pension is primarily a compensation payment and not an income support payment

⁶Youth Training Allowance and Job Search Allowance are the unemployment benefit schemes: also includes people in Community Development Employment Programs at 30 June 1998

⁷Includes children (aged under 16 years) in families receiving the Family Payment (greater than minimum rate): see text

⁸Excludes children of DVA pensioners as details were not available

Source: Compiled from data from DFACS and DVA

All health status and health service utilisation variables (with the exception of the variables for the Physical Component Summary, infant deaths, the Total Fertility Rate and immunisation status are age-adjusted and represented by standardised ratios.

- The Physical Component Summary is expressed as a mean score, with higher scores indicating better physical health.
- The infant death rate is calculated as the number of infant deaths (deaths under one year of age) per 1,000 live births.
- The Total Fertility Rate is a measure of the number of children a woman can expect to bear in her lifetime: it was derived by indirect age standardisation, based on Australian totals.
- Immunisation status is expressed as a percentage of children who were fully immunised at 12 months of age.

The number of beds in public acute hospitals (average available beds over 1995/1996) and private hospitals (available beds at 30 June 1997) have been mapped per 1,000 population of the area in which the hospital is located. Nursing home places and hostel places are mapped per 1,000 population aged 70 years and over of the area in which the facility is located.

The social health status’ clusters were produced by a joint analysis of the socioeconomic status and health status variables.

Symbols

- A = Actual
- E = Expected
- R = Rank
- SR = standardised ratio
- SAR = Standardised Admission Ratio
- SDR = Standardised Death Ratio
- * = significance at 5 per cent level
- ** = significance at 1 per cent level
- ‡ = standardised admission ratio not calculated, as there were fewer than five expected admissions, five infant deaths or 20 births (for the Total Fertility Rate)
- . = data suppressed as total population was less than 100
- .. = not applicable

Data sources

Table 3 shows data sources in addition to those footnoted in **Tables A1**.

Table 3: Data sources

Table	Data sources
Table A2	
Tables	
A2.1 to A2.2	Data for 1996 is at 30 June and was compiled in HealthWIZ from data supplied by the DFACS (for all variables), DVA (Service Pension (Age) and Service Pension (Permanently Incapacitated)) and ATSIC (Community Development Employment Program data, at 30 June 1998).
Table A3	
Tables	
A3.1	Data for 1995 and 1993 was compiled in HealthWIZ from data supplied by the ABS.
A3.2 to A3.4	Data for 1992 to 1995 was compiled in HealthWIZ from data supplied by the Registrars of Deaths.
A3.5	YPLL - Data for 1992 to 1995 was compiled in HealthWIZ from data supplied by the Registrars of Deaths. TFR - Data for 1992 to 1995 was compiled in HealthWIZ from data supplied by the ABS.
Tables A4	
Tables	
A4.1 to A4.9	Data for 1995/96 : With the exception of data for Queensland, data was compiled in HealthWIZ from data supplied by the AIHW from the National Hospital Morbidity Database: this database comprises data supplied to the AIHW by the State and Territory health authorities. Data for SLAs in Queensland were not available from the AIHW database and were obtained directly from the Queensland Health Department. The data was supplemented with details of the postcode or SLA of patients admitted to hospital in a State/Territory other than the State/Territory of their usual residence: these details were obtained from the individual State/Territory health authorities.
A4.10	Data for 1996 was compiled in HealthWIZ from Medicare statistics supplied by DHAC. Data for 1998 was compiled in HealthWIZ from immunisation rates supplied from the Australian Childhood Immunisation Register by the National Centre for Immunisation Research and Surveillance of Vaccine at the New Children’s Hospital, Westmead, New South Wales.
Tables A5	
Tables	
A5.1	Data for 1996/97 was compiled in HealthWIZ from Medicare statistics supplied by DHAC. Data for 1995/96 (public acute hospitals) and 1997 (private hospitals) was compiled in HealthWIZ from data supplied by DHAC.
A5.2	Data for 1997 was compiled in HealthWIZ from data supplied by DHAC.

Note: Details of abbreviations used in the table are ABS, Australian Bureau of Statistics; ATSIC, Aboriginal and Torres Strait Islander Commission; DFACS, Department of Family and Community Services; DHAC, Department of Health and Aged Care; DVA, Department of Veterans’ Affairs.
